CROSSMATCH®

The world identifies with us.℠

Imagine… a New World
of Authentication.

Imagine a World

Where…

Passwords can't be hacked

People can't share credentials

Users can't pretend to be someone else

Where authentication is more…

Secure

Complete

Human-Proof

Adaptable

That world is here.

Welcome to digital**Persona**.

The World Today

THE MISSION

Today, the mission is to protect the digital enterprise in an increasingly connected, open and accessible world – and offer protection in an environment where threats are continuously evolving.

THE CHALLENGE

Two-factor authentication – and even multi-factor authentication – are overly reliant on user participation. As a result, they don't adequately address today's dynamic challenges – and can never fully protect your enterprise.

THE SOLUTION

Rather than reengineering an inadequate solution, we created a new model: **Composite Authentication**. Success starts by moving from traditional authentication to a new, modern approach to enterprise security.

TRADITIONAL VS. COMPOSITE AUTHENTICATION

Traditional Authentication	Composite Authentication
Relies on a user-generated password	Uses the broadest choice of authentication factors
Secure access is dependent on human compliance	Eliminates the dependency on people to maximize security posture
The best protection is highly disruptive for users	Offers a frictionless user experience blending convenience and protection
Static authentication policies	Dynamic, risk-based policies that adapt to the threat environment
Provides incomplete coverage and inconsistent protection, user by user	Provides optimal security for every app, every user, every time, everywhere… now and in the future

Welcome to Composite Authentication

DigitalPersona's Composite Authentication approach offers the broadest set of factors, creating the right mix of authentication options for every user, moment by moment. We go beyond traditional authentication to provide risk-based factors that deliver the strongest, most complete protection available to secure your network, applications and digital assets.

BREADTH OF AUTHENTICATION FACTORS | The right mix of factors, moment by moment

Cases

Why Choose DigitalPersona?

CLOSE EVERY GAP	***Composite Authentication*** Offers the right authentication mix for every moment
COMPLETE COVERAGE	***100% Coverage*** Nothing is left behind – secure access for your network and legacy, cloud and mobile applications
HUMAN-PROOFED	***Frictionless*** Takes the authentication burden off the individual user
RAPID ADAPTABILITY	***Fast Deployment and Integration*** Deploys in days, not months, and is accomplished by existing resources with common IT tools

KNOW FOR SURE

Only Composite Authentication Closes **All** the Gaps.

digital**Persona**.

Implementing DigitalPersona is Easier Than You Think.

DEPLOY SWIFTLY.

DigitalPersona offers rapid adaptability. It integrates quickly with your current IT infrastructure, leveraging existing IT knowledge, which means you are up and running in days - not weeks or months.

ADAPT WITH MINIMAL HEADACHES.

There's no need for specialized IT resources – DigitalPersona operates via the IT team already in place and with common IT tools. This approach reduces disruption and simplifies ongoing support, driving down your up-front investment and administration costs.
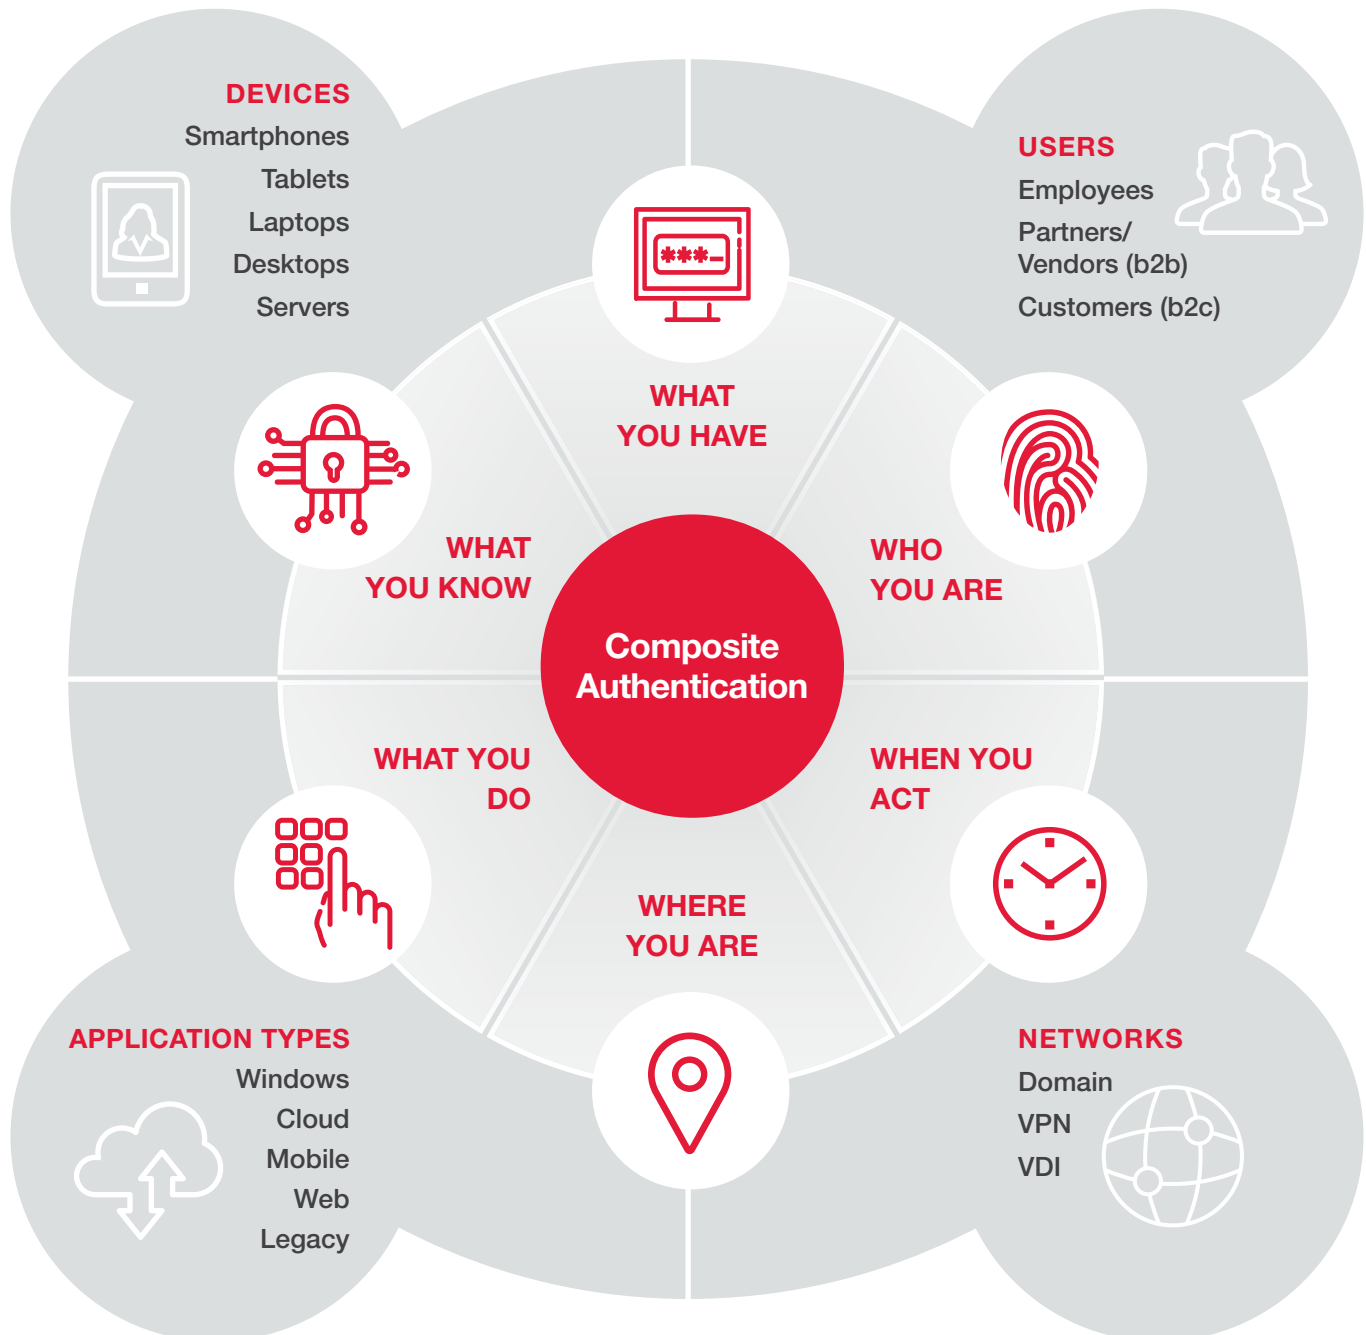

INCLUDE EVERYTHING.

With DigitalPersona, you get complete coverage for all your networks, applications and systems – nothing is left behind. We support ALL your applications including web, cloud, Windows, mobile, VDI and VPN. Better yet, ALL your constituencies are covered – employees, customers, vendors and partners. It also covers ALL your platforms and use cases.

DO IT EFFORTLESSLY.

DigitalPersona doesn't depend on the ability of humans to adhere to complex authentication policies. It's designed to be human-proof and human-friendly, which means it's easy on the users - as well as your IT staff.

Complete Coverage with DigitalPersona.

All your networks, applications, devices and users are covered.
